Spacious Rooms

There are suites of 3, 4, 5 and 6 rooms. Each suite has an atmosphere of spaciousness, with its large reception hall through which entrance to the other rooms is gained. All rooms are large, with high ceilings and ample windows, assuring an abundance of light and air. The windows are of plate glass of the finest quality, set in steel casement sash. As compared with the usual "double-hung" window sash, steel casements offer twice the amount of ventilation. There is an abundance of closet room. Dunham differential vacuum heating assures an even temperature, both in moderate and the coldest weather.

Many of the apartments include a music alcove which may also be used for a summer garden.

The living rooms are elegantly appointed and are equipped with the latest achievement of the radio world - - the Radio-Victor antenna system. This multiple receiver antenna distribution system eliminates any fire hazard, improves reception, completely shuts out static, and practically gives each tenant an antenna for individual reception.

The bedrooms are large and airy with plenty of light and ventilation, many of them having windows on two sides. Spacious closets with mirrored doors are a feature that will appeal.

The kitchens are complete in every respect. General Electric Refrigerators insure perfect refrigeration. The gas ranges and sinks are in pastel tints and harmonize with the room. Chromium plumbing fittings help make both the kitchen and bathroom bright and cheerful. Built-in kitchen cabinets, broom closets, etc., all lend an atmosphere of cleanliness and coziness. The gas ranges are of the most modern design. And the coziest part of these prettily laid out kitchens is the dinette. The kitchens are floored with inlaid linoleum of attractive patterns.

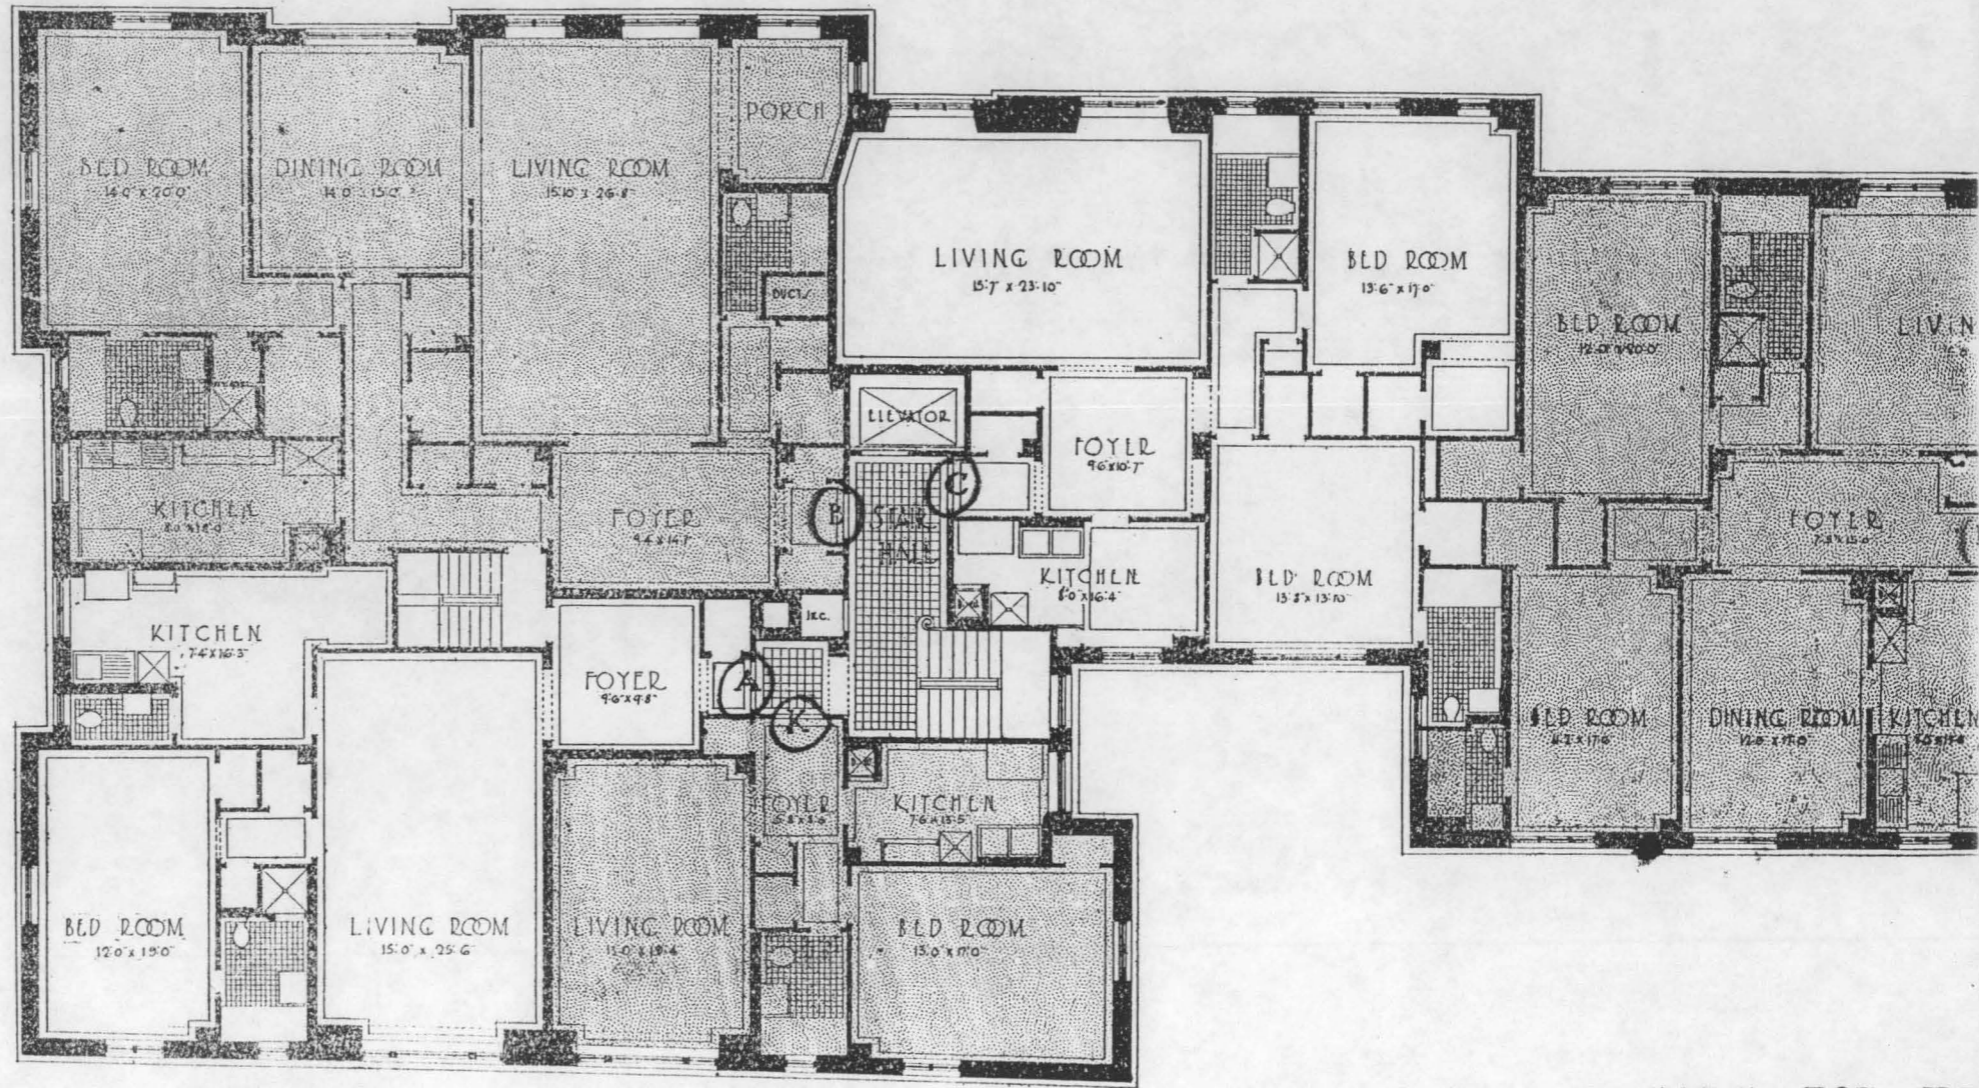

Delightful Duplex Pent Houses

There are two six-room pent houses with three baths, extra lavatory, and tiled gardens - - These pent houses are really private homes with every convenience of the modern apartment.

Distinctive Refinements

It would be difficult, indeed, to enumerate all of the refinements that have been provided for those who make their home at *THE GREENWAY*. The building is 100% fire-proof, which means the elimination of fire hazards and the maximum in scientific sound-deadening.
